**Post-Categorization of Substances on the Domestic Substance List:
Impacts of the Challenge for Pesticide Registrants**

On May 28, 2007 the PMRA posted a memorandum entitled, “*Post-Categorization of substances on the Domestic Substance List: Impacts of the Challenge for Pesticide Registrants*”. The purpose of the memorandum is to provide an update on the categorization of substances on the Domestic Substance List (DSL) under CEPA, 1999 and to outline potential impacts for pesticide registrants.

Memorandum is available at:

<http://www.pmra-arla.gc.ca/english/pdf/appregis/Memo-Post-categorization-e.pdf>.

While no pesticides are going to immediately be affected depending on the outcome of the challenge some pesticide ingredients could be re-classified as toxic and require further management action.
