

The Dell Tech Product Safety Group interprets complicated OSHA, WHMIS and GHS regulations so you don't have to.

Our Product Safety Group has been authoring professional looking and compliant MSDS documents for decades. Our team is proficient at analyzing and classifying complex product formulations and we pride ourselves on making value added recommendations to ensure compliance. Dell Tech works diligently to keep end users safe while ensuring your products are compliant in Canada and the USA.

MSDS & GHS SDS Preparation (Canada, USA)

Dell Tech will review and classify your product to the appropriate regulation in order to author MSDS/SDS that meet the various Canadian and USA requirements. Reviews include: Transportation of Dangerous Goods (TDG), Department of Transportation (DOT), WHMIS/GHS, OSHA Hazcom 2012 and HMIS/NFPA ratings.

Canadian and USA Consumer Labeling (CCCR, CPSC)

Dell Tech's professional Technical Consultants will review chemical product formulations and provide a report with the bilingual precautionary text necessary for your product label.

Canadian Food Labeling

Dell Tech can produce a Canadian compliant nutrition facts table, and analyze your complete packaged food label to ensure compliance with Canadian food regulations.

Canadian Supplier and Workplace Labeling (WHMIS)

The Workplace Hazardous Materials Information System (WHMIS) is used to provide Canadian workers with information on materials used within their workplace. This system is currently being replaced with GHS in Canada and Dell Tech has helped hundreds of companies with the transition.

E-Commerce Product Compliance

Dell Tech is your product compliance partner for selling products on E-commerce sites such as Amazon. Dell Tech will analyze your product formulation and prepare all your product compliance certificates. We can assist with a wide range of products including: cleaning products, air fresheners, reed diffusers, paint products, art & craft supplies, car care & maintenance products, adhesives, lighters or pet care products.

Trade Secret Applications (HMIRA)

The Canadian Hazardous Materials Information Review Act (HMIRA) registration is required to protect confidential business information (CBI), such as the specific chemical identity, weight and/or percentage of any trade-secret hazardous ingredients used within a product.

For 35 years Dell Tech has provided professional, confidential consulting services to the chemical specialty industry in Canada, USA, Europe and Asia.

We can assist your company with North American regulatory compliance including product registration, authoring of Safety Data Sheets (SDS), and laboratory performance testing.
